# OPTISOURCE™

## Hand Care Systems

INTRODUCING a new hand care dispensing system from Wausau Paper! The OptiSource™ dispenser features a unique design that will accommodate both liquid and foam soaps with the benefits of usage control.

### DISPENSER DESIGN

Our new OptiSource™ dispensing systems, with curved structure and elegant style, are the latest addition to the extensive Bay West® line of coordinated dispensing systems. The OptiSource™ dispenser features durable plastic construction for years of commercial use, and is available in five color choices to create a unique washroom appearance.

### CONTROLLED-USE DISPENSING

The OptiSource™ dispenser offers usage control which saves time and money. The OptiSource™ dispensing system meters the amount of product released in each push of the dispensing mechanism to control costs and reduce waste. When used with the liquid soap cartridges, 1.2 ml of product is dispensed in each push of the dispenser. With the foam soap cartridge, 0.4 ml of product is dispensed with each push of the dispenser.

Available in five color choices; Blue, Red, Black, White and Green.

## Available in liquid or foam

### OPTISOURCE™ SOAP PRODUCTS

The new OptiSource™ soap products are available in both liquid and foam formulations for a variety of applications.

**Pink Lotion Soap and Pink Lotion Foaming Soap for general washroom use.** Ideal for multipurpose needs in lavatories. Designed to replace expensive bar soap and low-quality liquid and powder soaps.

**Antibacterial Soap and Antibacterial Foaming Soap for healthcare concerns.** Contains 1% PCMX bactericide to effectively eliminate the broadest possible spectrum of bacteria. Controls nosocomial infection and provides superior skin sanitation. Contains rich emollients to help soften skin and prevent drying. Complies with FDA standards.

# Controlled-use Soap System

The new OptiSource™ handcare system is designed with several features and benefits that provide convenience and a reliable dispensing service.

The OptiSource™ dispensing system is designed for use with either foam or liquid soap. To dispense the foam soap products, the actuator stays in place. For use with liquid soap product featuring the round pump cartridge, simply remove the actuator.

The new OptiSource™ soap products are available in both liquid and foam formulations for a variety of applications. The unique sloping design of the 1000 ml cartridge ensures full evacuation of the soap from the cartridge for complete utilization and reduced waste. The cartridge also features a two-part adhesive label that can be removed and applied to the dispenser to show maintenance staff and patrons the soap product being dispensed.

The translucent back-housing allows maintenance staff to see at a glance when it's time to refill.

The back-housing is made with slots for easy mounting in a variety of installation patterns.

The dispenser features four guides that hold the cartridge in place for easy loading and maintenance.

The one-hand push design makes the OptiSource™ easy to operate.

The compact size of the OptiSource™ makes it ideal for applications where space is a consideration.

The snap-lock cover allows for easy maintenance.

## ADA TITLE III COMPLIANT

The OptiSource™ dispenser is ADA Title III compliant when installed according to the guidelines outlined in the ADA Standards for Accessible Design. Soap is easily dispensed from the OptiSource™ with one hand, with less than 5 lbs of force, and without tight grasping, pinching or twisting of the wrist.

## CUSTOM LABELING AVAILABLE

The new OptiSource™ dispensing system can be custom labeled with your company name or logo for a unique, coordinated washroom appearance.

## Green Seal Standards for Hand Cleaners and Hand Soaps (GS-41A)

- ▶ Must meet or exceed applicable governmental and industrial safety and performance standards.
- ▶ Cannot be a skin sensitizer or skin irritant.
- ▶ No antibacterial, disinfecting, antiseptic or sanitizing product claims can be made.
- ▶ Cannot be formulated or manufactured with phosphates, NTA, EDTA, APEOs, halogenated organic solvents, butoxy-ethanol, or with any chemicals that are proven, probable, or possible carcinogens.
- ▶ Fragrances used must be produced or handled following the code of practice of the International Fragrance Association. Fragrances must be declared on the product label and MSDS sheets.
- ▶ Can only be formulated or manufactured with food grade dyes.
- ▶ Cannot contain volatile organic compounds in excess of 1%.
- ▶ Based on standard use, hand cleaners cannot be toxic to aquatic life and must be readily biodegradable.
- ▶ Must include detailed instructions for proper use to maximize product performance and minimize waste.
- ▶ Must not be packaged in a bag in box packaging.
- ▶ Packaging must be recyclable (an exception shall be made for lightweight flexible packaging, such as pouches or bags, that represent at least 20% reduction in material use when compared with rigid packaging). Efforts must be made to ensure packaging contains post-consumer recycled content.

Bay West® towel and tissue dispensing systems are available in five translucent color choices to coordinate with the new OptiSource™ handcare system. Choose from translucent black, red, green, blue or white and add a company name or logo to create a unique washroom appearance.
