ADA Title III Compliance

This mark indicates that the dispenser is ADA Title III compliant. Roll towel dispensers require less than 5 lbs. of force to effortlessly dispense the towel as set forth in the ADA Accessibility Guidelines. On all ADA compliant dispensers, controls and operating mechanisms are operable with one hand and do not require tight grasping, pinching, or twisting of the wrist.

¹ Full unit grabs can be double stacked floor to ceiling in trailer.

Product and Dispenser Terms

Terms: 2% 15 days, net 30 days from date of invoice.

Prices: F.O.B. Harrodsburg, Kentucky with freight prepaid to final destination on half truck and full truckload orders.

All orders are subject to mill acceptance. Dispensing equipment may be purchased separately or in conjunction with paper products. Prices are subject to change without notice. Distributors shall be responsible for payment and reporting of any sales, use taxes, or other charges imposed by any government authority in the state in which they operate.

Pallet Sizes Available

40" x 48": Unload with hand jack. 2-way pallet.

48" x 40": Unload with fork lift. 4-way pallet.

53" x 45": Bulk tissue; pallet reduces overhang damage

If pallets are desired, there is a \$7.00 USD per pallet charge.

Slip Sheets: \$2.50 USD per slip sheet

Drop Shipments to End Users

Distributors may ship 200-case minimum orders directly to end users, for an additional charge of \$100.00 USD, under the following conditions:

1. The drop shipment must be within the distributor's trading zone.
2. The drop shipment must be within a 50-mile radius of the distributor.
3. The distributor must fill the balance of the trailer.

Notify your Wausau Paper Customer Service representative if the shipment is to be palletized, slipsheeted, or floorloaded. Routine charges will be applied.

Truckload Definitions

When ordering, use unit and layer configurations as defined below to best determine what will fit in a truck.

Orders are shipped on 53' trailers and will accommodate 23 to 30 units depending on the product mix and loading instructions.

A **Unit** is layers of cases stacked to a height from 87" to 100" (floor to ceiling trailer space) and fully shrink wrapped to lessen product damage in shipping and handling. A **Layer** is used to configure a unit. When ordering in unit multiples is inconvenient, then layers must be used to assure best fit in the trailer. Cases per layer can be found on this document.

All products, excluding soap and stock dispensers, are to be ordered in full unit load quantities. If you have needs to purchase low volume products in less-than-unit loads, they must be ordered in full layers. Only two units (approximately 90 cases) per full truck order will be accepted as a mixed unit consisting of even layered products. Half truckloads are allowed one mixed unit (approximately 45 cases) consisting of even layered products.

Cut and Fill Items are required on every truck order. These items must be a product listed on the purchase order.

- All half-truckload orders will be accessed a \$100.00 USD stop-off charge.
- All truckload orders with an additional stop to a single customer (i.e. customer warehouse) will be accessed a \$150.00 USD stop-off charge.

Wausau Paper offers a Complete Line of Green Seal™ Certified Paper Products

Wausau Paper offers Bay West® EcoSoft™ Green Seal™ and Dubl-Nature® towel and tissue products that are made from 100% recycled wastepaper and are certified by Green Seal, Inc. in Washington D.C. The "Green Seal" means our products meet the Green Seal environmental standards for paper towels and tissue, making the EcoSoft™ Green Seal™ and Dubl-Nature® products among the most environmentally preferable towel and tissue lines available in the away-from-home market.

EcoSoft™ Green Seal™ and Dubl-Nature® Post-Consumer Waste Content

Product	Brand	Post-consumer waste%

CenterPull and kitchen roll towels	EcoSoft™ Green Seal™	up to 49%
Toilet seat covers	EcoSoft™ Green Seal™	20%
Facial tissue	EcoSoft™ Green Seal™	10%

Green Seal Standards for Paper Towels (GS-9)

- 100% Recycled (recovered after papermaking process)
- Minimum 40% post-consumer wastepaper content (EPA guidelines)
- Wastepaper is not de-inked using solvents containing chlorine or any of its derivatives such as hypochlorite and chlorine dioxide.
- Wastepaper is not bleached using chlorine or any of its derivatives such as hypochlorite and chlorine dioxide.
- Paper towels do not contain any added pigments, inks, dyes or fragrances.
- Product is made in accordance with reasonable industry practice with respect to holes, tears, wrinkles, cleanliness, foreign materials or dirt. Product must dispense properly from the container (dispenser) or roll.
- The cores in the roll towels are made from 100% recycled materials.
- Packaging materials cannot contain lead, cadmium, mercury and hexavalent chromium in excess of 100 parts per million (above trace levels).

Green Seal Standards for Tissue (GS-1)

- 100% Recycled (recovered after papermaking process)
- Minimum 20% post-consumer wastepaper content; 10% in facial tissue (EPA guidelines)
- Wastepaper is not de-inked using solvents containing chlorine or any of its derivatives such as hypochlorite and chlorine dioxide.
- Wastepaper is not bleached using chlorine or any of its derivatives such as hypochlorite and chlorine dioxide.
- Bath and facial tissue does not contain any added pigments, inks, dyes or fragrances.
- Bath tissue contains a minimum of 40 square feet of product per roll; facial tissue contains a minimum of 70 square feet of product per box.
- Product is made in accordance with reasonable industry practice with respect to holes, tears, wrinkles, cleanliness, foreign materials or dirt. Product must dispense properly from the container (dispenser) or roll.
- The cores in the bath tissue and the box for the facial tissue are made from 100% recycled materials.
- Packaging does not contain inks, dyes, pigments, stabilizers or any additives to which lead, cadmium, mercury or hexavalent chromium has been intentionally introduced.
- Packaging materials cannot contain lead, cadmium, mercury and hexavalent chromium in excess of 100 parts per million (above trace levels).

Green Seal Standards for Hand Cleaners and Hand Soaps (GS-41A)

- Must meet or exceed applicable governmental and industrial safety.
- Cannot be a skin sensitizer or skin irritant.
- No antibacterial, disinfecting, antiseptic or sanitizing product claims can be made.
- Cannot be formulated or manufactured with phosphates, NTA, EDTA, APEOs, halogenated organic solvents, butoxy-ethanol, or with any chemicals that are proven, probable, or possible carcinogens.
- Fragrances used must be produced or handled following the code of practice of the International Fragrance Association. Fragrances must be declared on the product label and MSDS sheets.
- Can only be formulated or manufactured with food grade dyes.
- Cannot contain volatile organic compounds in excess of 1%.
- Based on standard use, hand cleaners cannot be toxic to aquatic life and must be readily biodegradable.
- Must include detailed instructions for proper use to maximize product performance and minimize waste.
- Must not be packaged in a bag in box packaging.
- Packaging must be recyclable (an exception shall be made for lightweight flexible packaging, such as pouches or bags, that represent at least 20% reduction in material use when compared with rigid packaging). Efforts must be made to ensure packaging contains post-consumer recycled content.
