

Wave'n Dry

Electronic Touch Free Dispensing Service

wausauPAPER

Wave'n Dry®

Touch Free Dispensing Service

INTRODUCING the newly redesigned electronic touch free towel dispensing service from Wausau Paper! The Wave'n Dry offers enhanced features that improve performance, reduce costs and maintain hygiene.

TOUCH FREE DISPENSING SERVICE

The Wave'n Dry® dispenser is the first roll towel system to offer totally touch free dispensing. The only thing you touch is your personal towel. The towel is stored fully protected inside the dispenser until you request service by passing your hand or arm underneath the sensor. Competitive designs leave the towel exposed to the restroom environment before it is dispensed. With the Wave'n Dry, the towel remains inside the dispenser until you request service. There are no levers, buttons or cranks to touch. This is particularly important in public restrooms, food preparation, and healthcare environments where prevention of cross-contamination is a concern. Touch free service meets customers demand for improved sanitation and supports the market trend toward automated restroom devices such as faucets and flush valves.

SIMPLE TO OPERATE

Towels in pre-determined lengths are dispensed by simply waving your hand or arm underneath the sensor. To dispense another towel, wave again. It is that simple. The sensor is located in the lower right corner of the dispenser and is pointed downward to eliminate sensitivity issues and allow the Wave'n Dry to be installed in tight locations.

CONTROLS USAGE

Metered dispensing and an adjustable built-in delay offer a reminder to use only the toweling needed. Dispensing can be tailored to your facility's needs with 8", 11", 16.5" or 22" of toweling dispensed with each wave. This feature allows you conserve paper without frustrating your customers as well as save on maintenance time and costs. The built-in reserve roll feature eliminates stub-roll waste and provides continuous service as a new roll will self-start only after the stub roll is completely used.

The Wave'n Dry is now available in five translucent color choices and will complement our Revolution™ and Dubl-Serv® tissue dispensers available in matching colors.

EASY-TO-USE BATTERY COMPARTMENT

The Wave'n Dry features a new battery compartment that is easily accessed for battery replacements. The Wave'n Dry now allows for installation of six D cell and one AA cell standard alkaline batteries directly into the battery holder. High-quality alkaline batteries will last up to 60 800-foot rolls when properly installed in an ideal application. Battery life will vary depending upon the quality of the battery purchased.

DISPENSER SETTINGS

The Wave'n Dry offers optional settings for length of towel, delay between cycles, and sensor sensitivity. To program the dispenser for your desired settings, open the unit door and set the four switches using the chart at the right. Then, close the cover and test for correct settings.

	8" Towel option	11" Towel option	16.5" Towel option	22" Towel option
Switch 1 Towel Length				
Switch 2 Towel Length				
Switch 3 Cycle Delay				
Switch 4 Sensor Sensitivity				
Switch 1 & 2	For Length of Towel Options - see chart above for settings			
Switch 3	For Delay Between Cycles Options - Short Delay is position 1 / Long Delay is position 0			
Switch 4	For Sensor Sensitivity Options - Low Sensitivity is position 1 / Normal Sensitivity is position 0			

Controlled Roll Towel Service

Wave'n Dry® is continuing to lead the way for Touch Free towel dispensing.

- The Wave'n Dry can be custom-imprinted with a company name or logo for a unique, coordinated washroom appearance.

- The back-housing is made with slots for easy mounting in a variety of installation patterns.

- The Wave'n Dry is completely self contained and requires no external electricity or wiring.

- The translucent cover allows maintenance staff to see *at a glance* when it is time to refill.

- The Wave'n Dry features quieter dispensing with an improved gear train certified by the American Gear Manufacturers Association (AGMA).

- The towel is kept clean and hygienic inside the Wave'n Dry until you request service by activating the sensor.

- Six D cell and one AA alkaline batteries are installed directly into the battery holder eliminating the need for special battery packs or adapters.

- Newly positioned sensor is pointed downward to eliminate sensitivity issues and allow for flexible installation.

ADA TITLE III COMPLIANT

By simply following the installation instructions outlined in the ADA Standard for Accessible Design, the Wave'n Dry dispenser is ADA Title III compliant. Paper is easily dispensed from the Wave'n Dry with one hand, with less than 5 lbs of force, and without tight grasping, pinching or twisting of the wrist.

SUPPORTS THE PRINCIPLES OF HACCP

As you are not required to touch the dispenser for use, the Wave'n Dry dispenser supports the principles of HACCP and is an excellent method for avoiding cross-contamination of food products.

Touch Free Dispensing Service

RECESSED UNITS

The Wave'n Dry can be easily adapted to fit securely in stainless steel recessed units, often found in upscale buildings and hotels. Customers can choose from black plastic, white plastic or stainless steel collars for a finished and coordinated look.

To order collars for recessed unit applications, contact your Wausau Paper customer service representative, 800-723-0001.

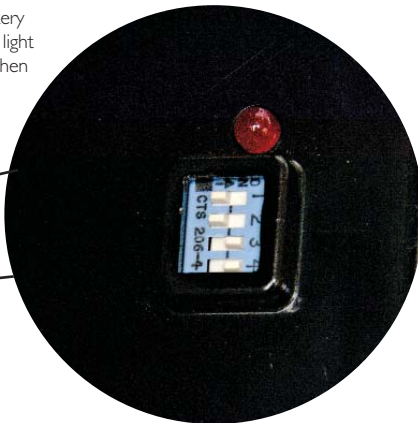

RECESSED COLLARS

No.	Name
18015	12" Recessed Collar-Black Plastic
18016	15" Recessed Collar-Black Plastic
18021	12" Recessed Collar-Stainless Steel
18022	15" Recessed Collar-Stainless Steel
18055	12" Recessed Collar-White Plastic
18056	15" Recessed Collar-White Plastic
18057	15" Recessed Collar Centered-White Plastic

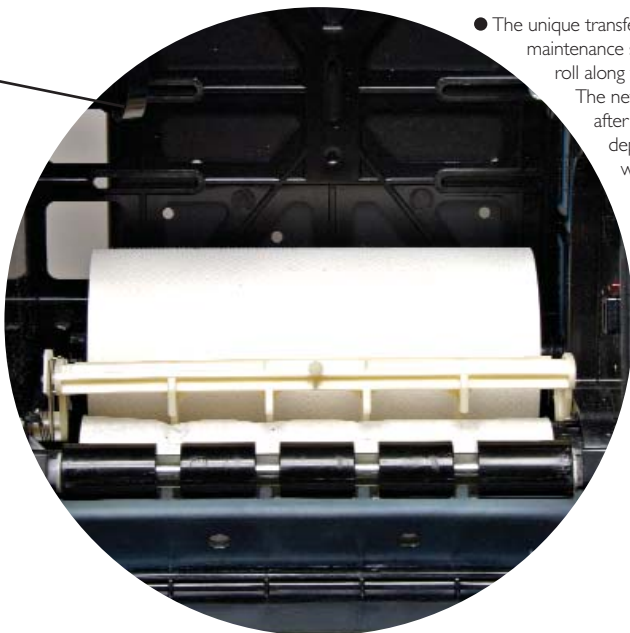

The Wave'n Dry is smaller than many competitive touch free dispensers, making it ideal for applications where wall space is a consideration.

- Low Battery Indicator light flashes when batteries are low.

- Switch settings adjust delay between cycles, sensor sensitivity and towel length.

- The unique transfer feature allows maintenance staff to insert a new roll along with a 4-inch stub roll. The new roll self-starts only after the stub roll is depleted, eliminating wasted toweling and service interruptions.

“NO WORRY” WARRANTY

All Wave'n Dry dispensers come with a “No Worry” warranty which states that for as long as you use Bay West® paper products, Wausau Paper will repair or replace a nonfunctioning Wave'n Dry dispenser due to manufacturing defect.

Bay West® Towel and Tissue Products

Wausau Paper offers a variety of Bay West® towel choices for every customer's needs.

The Wave'n Dry dispenser is compatible with both the premium DublSoft® and the 100% recycled EcoSoft™ controlled roll towels.

TOWEL CHOICES

Wausau Paper offers a variety of paper towel choices for use in the Wave'n Dry, including premium DublSoft® towels and three grades of 100% recycled EcoSoft™ towels in natural, natural white and white, some of which are Green Seal® certified. The Bay West® line of controlled-use towels are compatible with the

Wave'n Dry and other Bay West® controlled-use towel dispensers. This allows customers to order one product SKU for use in several different dispensers, minimizing required product storage and purchasing.

DublSoft®
PREMIUM PAPER PRODUCTS

PREMIUM PRODUCTS

DublSoft® premium towel and tissue products provide maximum softness, strength and absorbency. The box facial tissues feature sophisticated packaging designed for the most upscale applications and will complement any décor.

100% RECYCLED

EcoSoft™ towel and tissue products are designed for environmentally conscious customers. Made from 100% recycled wastepaper, all EcoSoft™ towel and tissue products meet or exceed EPA guidelines for post-consumer waste content. The EcoSoft™ line features several products certified by Green Seal, Inc. of Washington, DC. These EcoSoft™ Green Seal® products meet the Green Seal environmental standards for paper towels and tissue, and are among the most environmentally preferable towel and tissue products available in the away-from-home market.
