Wave'n Dry® Electronic Touch-Free Dispensing System

# wave'n DRY®

# ELECTRONIC CONVENIENCE

The Wave'n Dry® dispenser is a pioneer in the touch-free towel dispensing market. With no levers, buttons or cranks, the Wave'n Dry® dispenses a single towel at the wave of a hand, ensuring that the only thing you touch is your personal towel. Towels are stored fully protected inside the dispenser until you request service, which is particularly important in public washrooms, food preparation areas and healthcare environments where prevention of cross-contamination is critical.

## PERFECT FOR TODAY'S AUTOMATED WASHROOMS

The Wave'n Dry® is a breeze to operate. Simply wave your hand or arm under the sensor to dispense a single pre-measured towel. Reliable operation and features to extend the time between maintenance cycles and improve operational efficiency.

## INSTALL VIRTUALLY ANYWHERE

The Wave'n Dry® does not require external electricity or wiring so it can be located virtually anywhere. Ideal for food preparation areas. The Wave'n Dry® can be adapted to fit securely in existing stainless steel recessed units.

## VERSATILE

Tailor dispensing options to meet your facility's washroom requirements using the adjustable settings. A variety of towel grades and lengths provide multiple options to fit a range of preferences and budgets. The Wave'n Dry® is available in five translucent colors to complement any facility's design, and can even be imprinted with a company name or logo for a unique, coordinated washroom experience.

## ADA Title III Compliant

The Wave'n Dry® is ADA Title III compliant when installed according to the guidelines outlined in the ADA Standards for Accessible Design. Paper is easily dispensed with one hand, with less than 5 lbs. of force and without tight grasping, pinching or twisting of the wrist.

# ANCE FOR **AUTOMATED** WASHROOMS

## The Wave'n Dry® helps improve hygiene

**TOUCH-FREE** The towel is stored fully protected inside the dispenser until you request service; you touch only your personal towel, greatly reducing the risk of cross-contamination

**REDUCES BACTERIA** Paper towels reduce the number of bacteria on hands, unlike warm air dryers which can increase and spread harmful bacteria in the washroom

**HACCP** The touch-free design supports the principles of HACCP (Hazard Analysis and Critical Control Point) as an important preventative measure in avoiding cross-contamination

## The Wave'n Dry® is environmentally preferable

**CONTROLS USAGE** Metered dispensing of one pre-cut, pre-measured towel and an adjustable built-in delay discourage waste

**GREEN SEAL™ -CERTIFIED TOWELS** A variety of 100% recycled Green Seal™ -certified towels are available in lengths of 600, 800 and 1,000 feet

**INNOVATIVE TRANSFER ROLL** Built-in transfer roll feature eliminates stub roll waste and reduces service interruptions; a new roll starts only after the stub roll is depleted

## The Wave'n Dry® controls costs

**PRE-SET TOWEL LENGTHS** Tailor dispensing to your facility's needs by choosing a pre-set towel length of 8, 11, 16.5 or 22 inches

**HIGH-CAPACITY ROLLS** High capacity supplies of up to 1,000 feet improve operational efficiency

**ADJUSTABLE SETTINGS** Choose the optimal settings for delay between cycles and sensor sensitivity to conserve paper while meeting user needs

**LOCKING COVER** Prevents pilferage and waste

**MAINTENANCE AT A GLANCE** The translucent cover saves maintenance time as staff can see at a glance when it is time to refill the dispenser

**CONTROLLED-USE ROLL TOWEL DISPENSERS**
